We Put Our Energy Into Building Homes That Save It

At Habitat for Humanty Susquehanna, we're doing our part to help protect the environment. We've built more than 17 ENERGY STAR® qualified homes since 1994 and helped remove more than 98,821 lbs of carbon dioxide from the atmosphere annually.

This is equivalent to:

- Eliminating the emissions from 8.33 vehicles
- Saving 50,388 lbs of coal
- Planting 13.77 acres of trees

As an ENERGY STAR partner, we're proud to be part of a national effort that has:

- Saved enough energy to power more than 20 million homes;
- Removed the emissions equivalent to those from 23 million vehicles; and
- Helped Americans save \$12 billion.

To earn the government's ENERGY STAR, a home must meet strict energy efficiency guidelines set by the U.S. EPA. ENERGY STAR qualified homes are quieter and more comfortable, have lower utility bills, and help protect the environment by reducing greenhouse gas emissions.
