

Wolton Family Story

As a single dad my biggest dream is to give my daughter the stability and space she deserves. She's growing up so fast, and sharing a small one-bedroom apartment is becoming harder. I want her to have her own room, a place where she can dream, learn and just be a kid while enjoying the amenities of having her own space.

When I found Habitat for Humanity Susquehanna, I saw more than just a path to homeownership – I saw hope! A chance to build a future where my daughter has a safe, stable place to grow, a quiet space for schoolwork and a home where we can create lasting memories together.

This opportunity means everything to us. I am beyond grateful for the kindness and support of this community, helping to turn our dream into reality. One day, I hope my daughter looks back and sees not just a house, but the love, hard work and generosity that made it possible.
