

The Greniers

A few years after The Greniers bought their dream house, the beautiful stone facade began to fall apart. Within a couple of months, Tony and Tracy Grenier couldn't open their front door and the walls inside their home started to bow and crack. Homeowner's insurance wouldn't pay for the damage and they couldn't afford to fix the problem themselves. With Tony's part time employment and Tracy's recent diagnosis of multiple sclerosis, they needed our help. Luckily our Repair Program took some quick action and fixed the problem. The Grenier's were very appreciative and put a lot of sweat equity into the repair. They have saved the stones and are hoping to use them on their back porch.
